Oğuz Atalay

has successfully completed the online Specialization

Decentralized Finance (DeFi): The Future of Finance

In this specialization, learners developed the essential skills for understanding Decentralized Finance or DeFi. This includes an analysis of DeFi infrastructure and the problems that DeFi seeks to solve. The learners also mastered the key primitives in this space such as blockchain mechanics, supply and ownership, and loans and swaps. The learners also explored the leading DeFi protocols including MakerDAO, Compound, Aave, Uniswap and dYdX. Finally, with any new technology there are risks. Learners analyzed smart contract risk, governance risk, scaling as well as regulatory issues.

Cam Harvey
J. Paul Sticht Professor of International Business
Fuqua School of Business

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
